

Care manual for varnished furniture surfaces

Technical leaflet

Your piece of furniture has been sealed with a high quality ROSNER-Product. Hence your piece of furniture is generally protected. Every seal is however subject to natural wear. With regular care, the beauty of the surface is preserved longer. Varnished furniture surfaces should generally only be wiped with a dust cloth. If needed one can clean the surface with a damp cloth (not wet). A neutral cleaner can also be added to the cleaning water. Afterwards the surface should be cleaned with clear water and rubbed dry.

Furniture polish and wax products should not be used (otherwise surface interferences can develop). Moreover the use of these products could impair the further application of the a coat (crater development).

The product and the references in this instruction card correspond to today's state of the art. Our application technology recommendations in word and writing, which we give due to our experience after best knowledge, are noncommittal and justify no contractual legal relation and no additional obligation from the sales contract. They do not release the user from his obligation to check the existing underground and the suitability of our products for the intended purpose with own responsibility. In case of doubt suitability and quantities consumed are to be examined by creating a sample surface. When merging other products with our own products or in common processing with foreign manufactured products we cannot guarantee a perfect final result of the surface. During the processing of our products the contracting regulation for building works and supplies (VOB) is to be considered. Our general terms of payment and supply apply.
